

SYMBIO-LAB

Dietary supplement contract manufacturing

Your brand, our products

Our main staple is contract manufacturing of dietary supplements and cosmetics. Additionally, we offer packing services. We fill in products supplied by our customers to their holding packaging and then pack them into their final retail packaging.

Together with our clients, we develop new products and ideas, starting from the conceptual level. Our aim is to support our partners on every stage if needed.

We do:

- Product development
- Manufacturing process management
- Packing
- Labeling
- Retail packaging
- Transport and delivery

Under professional guidance of our pharmaceuticals and cosmetology specialists the products we develop, manufacture and deliver will meet all European Union norms, standards and requirements.

WE PRODUCE:

To make our job easier down below you can find a scheme with every information we need to get before the product quotation:

- Product composition or its purpose
- Product form
- Order volume
- Target price for single packaging
- Detailed packaging description, including:

Capsules quantity in bottle/blister, quantity of blisters in box, color/capacity of the bottle, bottle type (PET/HDPE/GLASS), outer box, leaflet

Lead time depends on product form – we estimate it from 4 to 12 weeks excluding transport.

Product R&D is an additional cost for customer. We refund that money if it comes to the final order.

MOQ:

Softgel capsules	from 300 000 to 1 mln pcs
Hard capsules	200 000 pcs
Effervescent tablets	200 000 pcs
Sachets	150 000 pcs
Liquid forms	from 3000 pcs
Powder forms	from 400 kg
Shots	10 000 pcs

CBD products:

Oils	100 pcs
Softgel capsules	50 000 pcs
Hard capsules	200 000 pcs

We subcontract the packaging with producers and printheuses that specialise in deliveries to the pharmaceutical branch. That way we can offer a wide array of possibilities to create professional and exceptional shelf presentation of the product.

The filling and packaging services make a separate activity of our company to which we put much attention and care. We specialise in filling jars and bottles and in blistering products. We can pack powdered content, tablets and capsules or liquids if needed. We pack the final product into their retail packaging and then prepare them for shipment in collective packaging.
